

## Lightweight, Compact, High Sensitivity Level Switch!

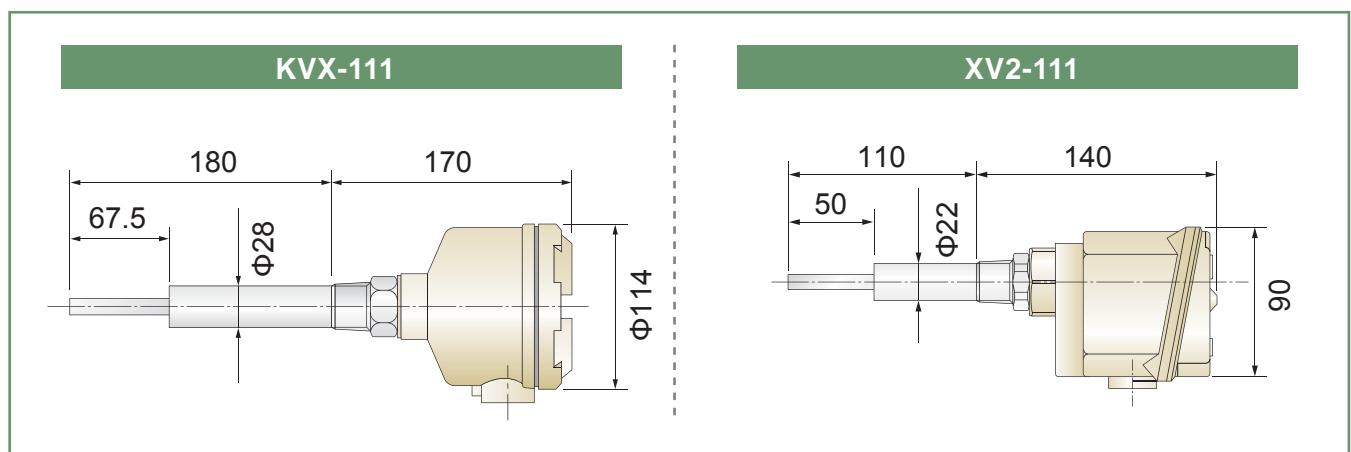

Specific gravity  
over 0.03 available

### ■ Features

- Possible to measure objects with physical property change such as dielectric constant, moisture content, etc.
- No sensitivity adjustment required
- Best durability without sealing kit
- Able to detect light powder which is difficult to measure (Standard: 0.1, Option: over 0.03)

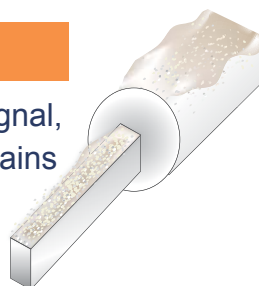

### ■ Lineup

### ■ Special angle shaped sensing rod (Option)

#### Standard rod

Can't provide the output signal,  
caused by the powder remains  
on the rod

#### Angle shaped sensing rod

No powder remains on the rod  
(Powder avoid the rod)
