

**Catch any level of powder/granules in various process
by taking advantage of our many years of experience**

Rotary paddle type level switch	Swing type level switch	Capacitance type level switch	Vibration type level switch
NL/NM/FL-GM series  Standard level switch for powder/granules ! Abundant models and long-term stable operation	SWM series  Innovative patented level switch ! Enable phenomenal long life by unique measurement principle	ALN / ST8  Respond to all measurement conditions with more than 1000 kinds of sensor types and special circuits	KVK/KVA/KVS series  Measurable low specific gravity over 0.1 !
Microwave type level switch	Microwave type flow sensor	Capacitance type level meter	Emergency pull-wire switch
MWS2-24TN/RN  Non-contact detection with high frequency of 24Ghz. Even difficult objects like paper or garbage can be sensed	KFD-1  Non-contact detection of flow or clogging of powder/granules in pipe	KLI  There are a variety of probe type to meet your unique applications. Built-in amplifier version is also available	KP-850/860/870  It is necessary to ensure the safety of personnel or protect devices on conveyer system
