

## Capacitance Type Level Switch

**L1P2**

Pipeline tubing type

Confirmation of residual material in pipe and idling prevention of pump

Flange

Ferrule

Possible to manufacture !

Flange Type

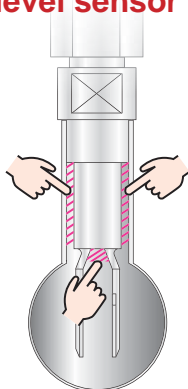

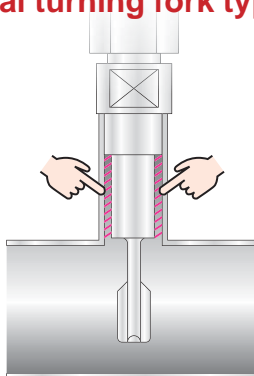

Ferrule Type

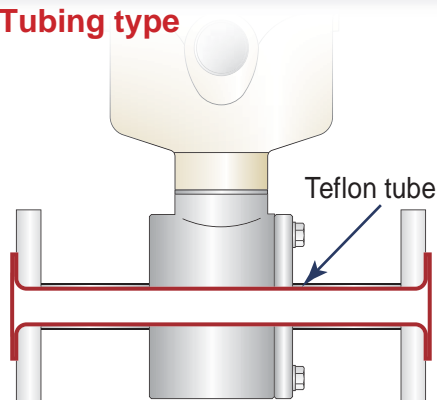

### ■ Conventional turning fork type level sensor

Liquid reservoir

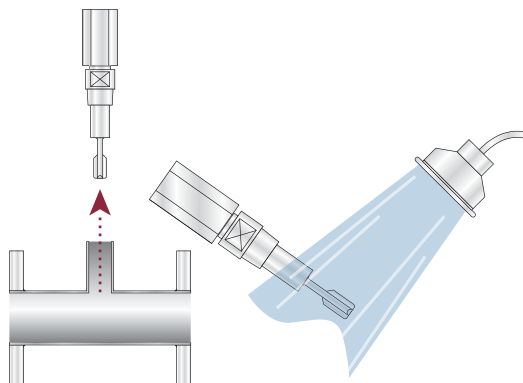

It tends to become a liquid reservoir at installation part of a sensor or a roots of turning fork

### ■ Tubing type

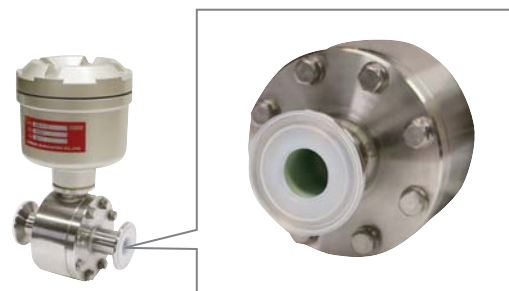

The inside wall of pipe is covered with no seam Teflon tube, so do not worry about reservoir of liquid.

Cleaning

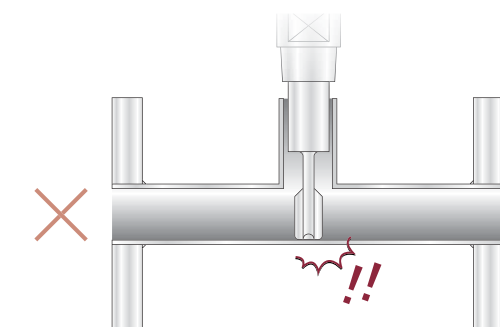

Require additional work to take out a sensor from a socket every cleaning time

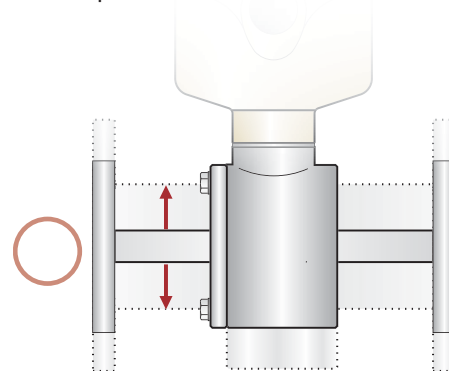

By Teflon coating, keep hygienic and easy wash.  
(Cleaning with boiling water and cleanable CIP/ SIP specifications can also be available.)

Installation

Cannot be applied to small caliber pipeline

Respond to wide range of applications from minimum flange size of 15A.
