

Capacitance level switch

Pipeline type

We manufacture with the pipe diameter that you need.
* 15A ~ 150A

Sensor doesn't protrude into the pipe

Sanitary type available
* Ferrule or union nut

Detect the presence of material inside the pipe

We will customize it from 1 unit.
TEFLON tube type, high sensitivity type and more.

Advantages of pipeline type

Straight probe type isn't suitable to the applications such as...

- The probe disturbs the flow of the materials.
- The pipe diameter is too small to install.
- The probe is jointed. The joint part may get contamination or residuals in food or pharmaceutical processes.

What is contamination?
Ingress of foreign materials
(= residuals)

Pipeline type solves all !!

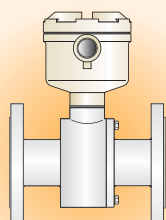

- Flow won't be disturbed.
- You can select the pipe diameter that you need.
- Pipeline type doesn't have any joint part.
No worry for contamination or residuals.

Pipe diameter
Available from 15A to 150A

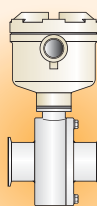

Special specs

We manufacture TEFLON tube type for option ! Suitable for food or pharmaceutical processes and corrosive liquid.

Flange Type

Ferrule Type

Select the pipe diameter that you need!
No worry for contaminations or residuals!
