

Swing type level switch

Case cover with a window

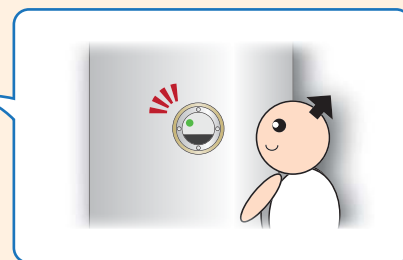

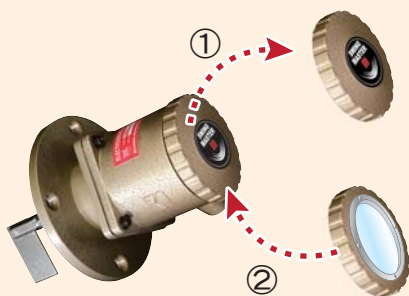

Introduction of case cover with acrylic window

We can install an acrylic window on the case cover of SWM series!

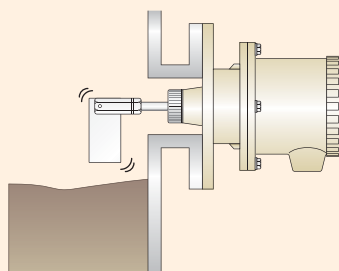

Why should we install an acrylic window?

Because we can see inside the case through the window.
You will know at a glance the status inside the tank.
You don't even have to remove the case cover.

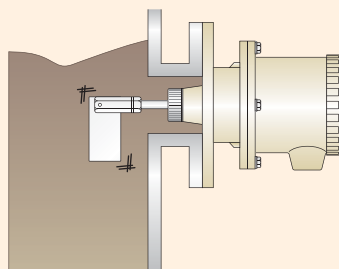

How do the pilot lamps work?

"SWING"
lamp is
GREEN

The paddle is **moving**
and the tank is **empty**.

"OUTPUT"
lamp is
RED

The paddle is **buried** in
the materials and
the tank is **full**.
