

Microwave Level Switch

**24GHz
Transmission**

Makes it possible to detect paper waste etc. which until now has been difficult to detect with a contact level switch.

Paper waste

Plastic waste

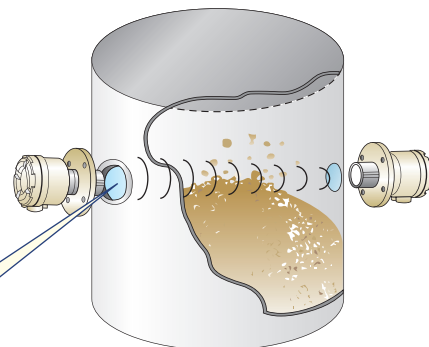

Sawdust

Non-Contact Detection

A detection window on the tank, makes non-contact detection possible.

The detection window should be made of transparent materials such as glass, Teflon and ceramic.

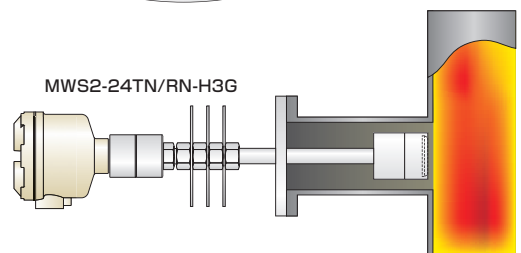

Heat Resistant Model

Please apply heat resistant models in high temp. environments such as incinerators.

MAX.400°C

※Please contact our sales if the site temp. is over 400°C.

Remote Amplifier Model

Please apply the remote amplifier model when there is a possibility that the built-in amplifier cannot stand the tank vibration.

MAX.10m
